

Figure 1. Soil geochemical results – zinc (contours 0.05, 0.1, 0.2, and 0.5%); Lydian's orientation soil lines positions and trace of underground adits included. (grid squares are 500m by 500m).

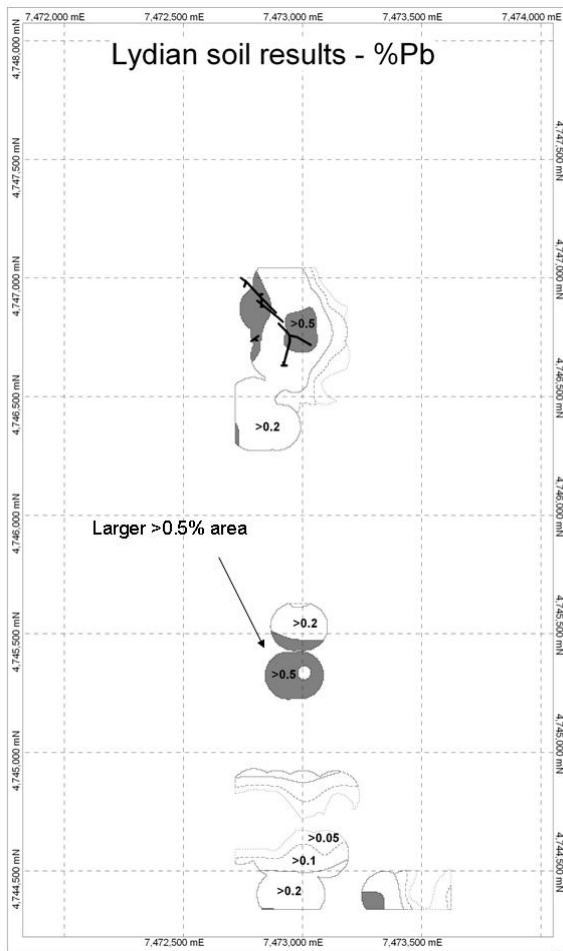

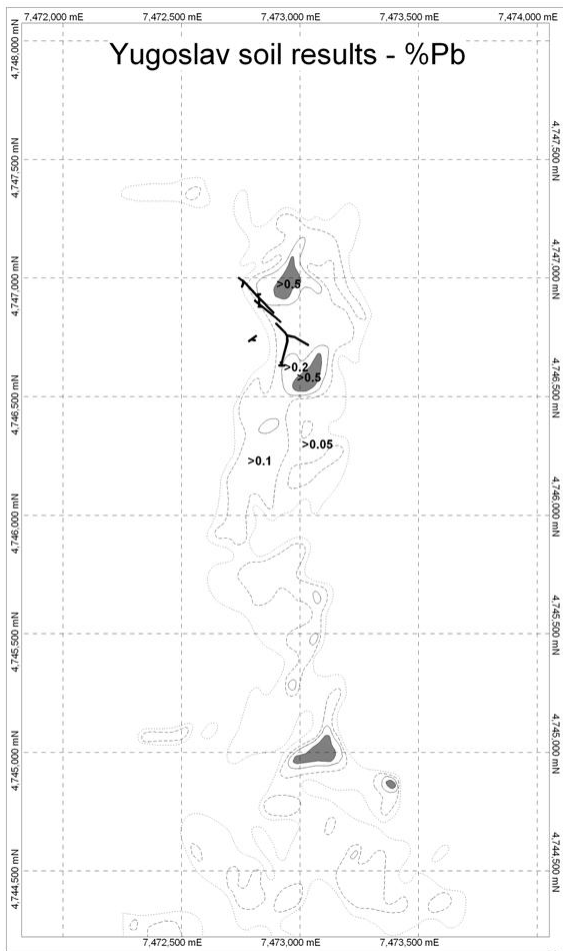

Figure 2. Soil geochemical results - lead (contours 0.05, 0.1, 0.2, and 0.5%). Lydian's orientation soil lines positions based on Yugoslav Zn contours (Figure 1 - left).
